— THE COMPANY

Direct from the quarry face

We are the quarry owner — not a trader or re-packer. Block selection, sawing, calibration and cut-to-size production happen under one roof, which is how we keep colour and thickness consistent across repeat and phased orders for UK contracts.

- 01 We own the quarry**
 Quality and price aren't diluted by middlemen — you buy at source, with full traceability from block to pallet.
- 03 Cut-to-size in-house**
 Steps, copings, sills and bespoke sizes produced to your cutting list — no outsourcing, no surprises on tolerance.

- 02 Repeatable colour batching**
 We reserve and reference your batch, matching shade and tone across repeat orders — critical for large or phased projects.
- 04 35 years & ISO 9001**
 Three and a half decades of export production behind every crate, backed by a certified quality system.

— THE STONE

Ivory Travertine — sizes & formats

A warm, light-cream travertine with the clean, even background UK specifiers ask for. Stocked in the three most-wanted formats, with 2 cm and 3 cm thicknesses and cut-to-size for steps, copings and bespoke project sizes.

SIZE (CM)	IMPERIAL REF.	THICKNESS	FINISHES	BEST FOR
40.6 × 61 × 1.2	610 × 406 16" × 24"	1.2 cm	Honed & filled Tumbled Brushed	Interior floors, large-format walls
40.6 × 40.6 × 1.2	406 × 406 16" × 16"	1.2 cm	Honed & filled Tumbled Polished	Bathrooms, hallways, kitchens
61 × 61 × 1.2	610 × 610 24" × 24"	1.2 cm	Honed & filled Brushed Polished	Living spaces, commercial floors
Above sizes	—	2 cm / 3 cm	Tumbled Brushed Unfilled	Pavers, exterior, pool surrounds
Cut-to-size	on request	1.2 - 3 cm	All finishes Edge profiles	Steps, copings, bespoke project sizes

Also available – French / Opus pattern sets · bullnose & pool copings · skirtings, sills and thresholds in matching stone. Batch-matched to your previous order on request.

— PATTERNS & SPECIAL PIECES

Pattern sets, copings & split-face

Beyond the standard tile sizes, we produce ivory travertine in French / Opus pattern sets, pool copings and edge pieces, split-face cladding and bespoke cut-to-size — all from the same quarry, batch-matched to your floor.

FRENCH / OPUS PATTERN SET

BULLNOSE POOL COPING

SPLIT-FACE CLADDING

SPECIAL PIECE	TYPICAL SIZES	THICKNESS	FINISHES	BEST FOR
French / Opus pattern	4-tile set 8×8 · 8×16 · 16×16 · 16×24"	1.2 - 3 cm	Honed & filled Tumbled	Floors, patios, courtyards
Bullnose coping	30×61 · 33×61 drop-edge / full bullnose	3 cm / 5 cm	Tumbled Brushed	Pool edges, steps, capping
Split-face cladding	multi-size strips L-corner pieces available	1.5 - 3 cm	Natural split	Feature & exterior walls
Skirting & sills	cut-to-size to your schedule	1.2 - 3 cm	All finishes Edge profiles	Skirtings, window sills, thresholds
Steps & treads	cut-to-size bullnose / chamfer edge	3 cm / 5 cm	Honed Tumbled	Stairs, entrances, garden steps

All special pieces are cut from the same ivory reserve as your tiles and batch-matched on request, so patterns, copings and cladding read as one continuous material across a project.

— SURFACE FINISHES

Choosing the right finish for the UK

Five finishes, each suited to different rooms and exposures. The guide below is our standard recommendation for British interiors, bathrooms and the UK's wet, frost-prone climate.

				
<p>Honed & Filled</p> <p>Smooth matt face, pores filled. The default for interior floors and bathroom walls & floors.</p>	<p>Polished</p> <p>Sheen that lifts the veining. Best for walls, vanities and feature floors — not wet areas.</p>	<p>Tumbled</p> <p>Aged, softened edges and a grippy matt face. Ideal for bathrooms, patios and pool surrounds.</p>	<p>Brushed</p> <p>Lightly textured matt with good grip and warmth. Interior floors and slip-aware spaces.</p>	<p>Unfilled / Split</p> <p>Open pores that drain water. Exterior cladding, copings and 3D feature walls.</p>

FINISH	LOOK & TEXTURE	INTERIOR FLOORS	BATHROOMS	EXTERIOR (UK)
Honed & filled	Smooth, matt, even	● Recommended	● Floors & walls	● If sealed
Polished	Reflective, defined veining	● Low-traffic / dry	● Walls, vanities	○ Not advised
Tumbled	Aged, rounded, grippy	● Rustic floors	● Slip-resistant	● Patios & pools
Brushed	Textured matt	● Recommended	● Good grip	● Sheltered areas
Unfilled / split-face	Open pore, natural	○ Features only	● Walls	● Cladding & coping

● recommended · ● suitable with sealing / care · ○ not advised. UK exterior: choose 2-3 cm calibrated stone, lay on a full mortar bed and seal on installation – unfilled & tumbled drain best in freeze-thaw.

— TECHNICAL DATA

Tolerances, calibration & packing

Indicative figures for ivory travertine. Full EN test certificates are supplied per batch, and packing lists are confirmed at order.

<p>THICKNESS TOLERANCE</p> <p>±1 mm</p> <p>Calibrated tiles · ±2-3 mm cut-to-size</p>	<p>CALIBRATION</p> <p>Back-calibrated</p> <p>Uniform thickness, fast level fixing</p>
<p>BULK DENSITY</p> <p>~2,450 kg/m³</p> <p>Dense, low-void ivory grade</p>	<p>WATER ABSORPTION</p> <p>~2-4%</p> <p>By weight, indicative</p>
<p>COMPRESSIVE STR.</p> <p>~85-100 MPa</p> <p>Indicative, EN 1926</p>	<p>SIZE TOLERANCE</p> <p>±0.5 mm</p> <p>Calibrated & rectified formats</p>

Packing & loading

Crates	Fumigated wood, ISPM-15
1.2 cm tiles / crate	≈ 20-22 m ²
2 cm tiles / crate	≈ 11-13 m ²
3 cm pavers / crate	≈ 8-9 m ²
Crate weight	≈ 1,100-1,300 kg
20ft container	≈ 22-24 tonnes

Tiles bundled face-to-face with interleaving; slabs on A-frame bundles. Part-container and trial-pallet loads palletised for forklift handling at Felixstowe.

Trade FAQ

Minimum order?

No rigid minimum — a single trial pallet (≈20-22 m²) or part-container is welcome before scaling to full-container, batch-matched orders.

Underfloor heating?

Yes — natural stone conducts heat well. We recommend honed & filled tiles on a stable substrate, flexible S1/S2 adhesive, commissioned gradually.

Frost-proof for UK exteriors?

The dense ivory grade performs well in freeze-thaw when specified at 2-3 cm, laid on a full bed and sealed on installation.

— UK DELIVERY & TERMS

CIF Felixstowe — trial orders welcome

We ship CIF to UK ports with Felixstowe as our default, and welcome trial pallets and part-container orders so you can test the stone before committing to volume.

CIF to Felixstowe

Cost, insurance & freight to Felixstowe as standard; other UK ports (London Gateway, Southampton, Tilbury) on request.

PORT · FELIXSTOWE (FXT)

Lead times

Ex-stock formats loaded in 1-2 weeks; cut-to-size production 2-4 weeks. Sea transit to the UK approx. 10-15 days.

PRODUCTION + SAILING

Trial & part orders

Start with a single pallet or part-container, assess calibration and colour, then scale to full containers with matched batches.
